Hello,I am looking to build a rig for my bass guitar. I plan on using a Sunn 2000s head which puts forth about 120 watts by means of a quartet of 6550's. Ideally I would like to build up a pair folded horns loaded with 15's. The Pi ten looks to be very interesting. If possible, I would greatly appreciate any additional informationon the design. Thanks so much,Brian
