Hello,I'm considering buying or building a DIY tube amp. Before I commit, I'll need a pair of efficient speakers. I'm hoping someone in Arizona has a pair of 4Pi speakers and would be interested in letting me hear them. Thanks,Danno

Southern Ca. 4 Pi Theaters. You are welcome to come over and have a listen. I've been using them several weeks now, with some custom and slightly hot rodded Billie amps and a Foreplay. When all is quiet and I'm listening in near field with a good recording, the word luscious comes to mind. With the subwoofer and Pi's cranked up the words structural damage come to mind. These are really nice speakers for use with small amps. Thanks Wayne for a great product, and sharing your Knowledge so freely. Rich Drysdale
