Does anyone in the Philly/NJ area have a pair of Pi's they would like to show off? I'll spring for your favorite adult beverage to hear a pair of one's, two's, three's or four's.It could be an interesting evening. I've got a pair of OTL monoblocks or a super el34 amp that might be worth a listen if you haven't been down that road.Thanks.

Closest I can come to Pi 4s is a 2226H in Pi aligned box 3.5 cubic ft tuned to 40hz with Klipsch 604 horn Selenium driver. I use a 0.7mh choke on the 2226H and 10uf cap on the horn with "L" pad that's all. Mechanicsburg Pa about 90 minutes from downtown Phila.You can email me schollaudio@hotmail.com
