Well, we continue to unpack boxes - hundreds of them! Today I ran across the crossovers for the Edgar horns & JBL 2226 combo, had to hurry and hook them up just to have a quick listen at lunch time. Wow, I missed those! I also wanted to give a big public thank you to Ron (Spkrman) and Greg (new Ohio audio buddy)for helping to pack some of my prized stereo junk. Ron, it turns out you were right, the packers were animals! So thanks, and glad you guys were there to contribute and help reduce the stress a bit. Turns out about 20% of our stuff is still stuck in Ohio someplace, but with luck it should be here soon.

Steve,  Sad to say, but I knew some guys back when I was younger who worked for moving companies like the one you used. They used to talk about "pilfering" whatever good stuff they could find as the customer would just file a claim with the moving company and be reimbursed. Glad you have the main audio system up and running again!!!Ron sends

good for you then..for finding it!! did you put any labels on the boxes? labeling it make it easier for you to unpack things which is in your priority lists..
