Thanks for posting this here. Most of the guys that hang out on this forum have really big speakers, so knowing a good place to do LTL trucking is helpful.The Midwest Audiofest is a blast and I wish you were here. Maybe you'll have to come next year!

Subject: can residential pickup

be arranged? At a small town in the western province of the Republic de Tejas? I would find "new homes" for some of my larger vintage enclosures if I knew how to "send them on their way". Strapped to a pallet? Largest would be about 34Wx20Dx30T. Sam

Hi Sam,Residential Pickup can be arranged - the caveat is Freight Carriers impose a Residential Pickup and or Residential Delivery surcharge.In the near future we will have negotiated rates that include a lesser RP and RD surcharge.You should consider utilizing pallets given the dims 34W X 20D X 30T. Anything much less in density may prove too costly to utilize a pallet.Perhaps there is a vendor in your area that sells used pallets that you can hand pick through which may also reduce overall landed cost.I appreciate your inquiry and if we may be of service please advise.Chuck
