Thanks for posting this here. Most of the guys that hang out on this forum have really big speakers, so knowing a good place to do LTL trucking is helpful. The Midwest Audiofest is a blast and I wish you were here. Maybe you'll have to come next year!

Subject: can residential pickup

be arranged? At a small town in the western province of the Republic de Tejas? I would find "new homes" for some of my larger vintage enclosures if I knew how to "send them on their way". Strapped to a pallet? Largest would be about 34Wx20Dx30T. Sam

Hi Sam,Residential Pickup can be arranged - the caveat is Freight Carriers impose a Residential Pickup and or Residential Delivery surcharge. In the near future we will have negotiated rates that include a lesser RP and RD surcharge. You should consider utilizing pallets given the dims 34W X 20D X 30T. Anything much less in density may prove too costly to utilize a pallet. Perhaps there is a vendor in your area that sells used pallets that you can hand pick through which may also reduce overall landed cost. I appreciate your inquiry and if we may be of service please advise. Chuck
