For comfort, the room scores a 9. For acoustics, it scores a 6. Not too bad, all in all. Definitely pleasant. We installed no treatments or anything fancy but it was just fine.We connected just about every kind of amplifier from tiny flea power SETs to 2400 watt arc welders. Sounded great - I didn't hear anything didn't like. In fact, I went from room to room throughout the show a couple of times over the weekend and found that pretty much everything sounded good, with only a couple of exceptions. Seems like everyone was "right on" because they all had good sound, and even the exceptions weren't "bad" - Just not up to the level with the rest of the pack.You were missed. Ron Semega and I were just talking about you, in fact, lots of people here asked about you this weekend. several of the "regulars" were here, and we picked up quite a few more.
