Subject: JBL 2225 diaphram, JBL 2226H recone

Hey everyone.I originally wanted the JBL 2226H to cover 70Hz-300Hz just as a direct radiator (I think it is suitable for this range). These drivers cost a lot though, but I've found something that might work, so I will ask here first. I can get JBL 2225 basket/diaphrams. I can't get any 2225H recones though, but I can get some non-genuine JBL 2226H recone kits. Will these fit in the 2225H baskets? If so, will it then technically be a 2226H? Any advice is greatly appreciated!BTW: How good are the aftermarket/non-genuine recones? Are they much the same as the originals? I can get ONE original recone here in Australia, but I need a pair so I would get a pair of non-originals (they are also a bit cheaper). Thanks!Adrian

Hi....The 2226 won't fit a 2225 basket but a 2235H uses the same 15" frame as the 2225, so that could be a option. The 2235H was used in a lot JBL studio monitors. It's power handling is no where near that of the 2226 but their intended uses are very different. Kelly

AdrianIMO, for home speakers, you would be better off having the 2225 reconed to a 2235, than getting a 2226. Look around one the internet for some 2235 recone kits and have them shipped to

you "surface" mail. it will take about 4 to 6 weeks but the rate is very inexpensive. I've never had any problems shipping to Australia with surface mail.Bill

Hey Bill. Sounds like a good idea. I can actually get the 2235H recone in Australia, but its a HUGE $395 !!!!!!! each!!! I think I'll wait till its on eBay US hopefully its cheaper :)BTW: 2235H has larger excursion than 2225H, will it have the same larger excursion even though its in a 2225H basket?Thanks!Adrian

If you put a 2235H cone in a 2225 frame it will be a bonifide 2235H....the frames are one and the same....good luck.Kelly
