Thanks for answering my previous 10 pi questions several posts ago, but I still have (and likely will have others) a question about the 10 pi plan page entitled "Motor sub enclosure Baffle cutout." The page shows three illustrations. Two on the left, above and below each other, and one illustration to the right of these other two illustrations. What is this piece? It appears to be a "side" for the motor sub enclosure, but the "sides" are made up of the main cabinet sides, as we discussed in the previous post. Sorry, I really have thought about this for a while and it remains a mystery to me!

Thanks for the help, Russellc

That picture is a sort of a transparent view. Looking at the side of the actual loudspeaker, all you will see is the side of the cabinet. The lines drawn in the plan's side view just show you how the diagonal panels and the motor cabinet are situated inside.

Now that does make sense! I could not for the life of me figure out what that part was!

Thanks, Russellc
