If you live anywhere near St. Cloud, MN and you're thinking about building a pair of 2-Pi towers, these may be for you. Although they sound glorious even in their unfinished state, they're simply too big for my apartment listening room (getting complaints from neighbors).The cabinets are constructed from high quality 3/4" MDF (heavy!) but the speakers need finishing, including permanently mounting the drivers, adding internal bracing, and sanding and finishing the cabs. The Eminence mid/woofers still have their original shipping boxes and I will include quality floor spikes, terminal cups, inductors + Pi logos.Priced to sell at $150 OBO. *This ad approved by Wayne.
