Check out the art that Dragan Veselinovic sent me today:He's done several other neat prints, and he sent me three of 'em. I like the one above best, and the "Hot Valves" print is really great too. The "OTL" print is pretty groovy and the "Solid State" print is cool too.So check out Dragan's Audiophile Art site. The prints are only $20.00 each, and they're pretty cool. You'll really like having one in a nice frame for display in your listening room.
