Whatever you had planned for this weekend it has to be shelved as we put together an audiophile Intervention for poor Bill. He e-mailed me privately, but needs to be outed as I am informed that he removed his Denon A/V processor from the audio loop, carefully arranged all the wires, and, (GASP!) purchased an Audible Illusions pre-amp!!!!!!!!!!!!!!Bill, Bill, where did we go wrong? We tried to show you the dynamics, the bass, the low distortion. We did! Oh, the horror. Please help me help a friend. Donations of Zipcord, generic resistors and Oh my, can it be?.....yes, he's trying a Shakti Stone!!!!I hope we're not too late!Creating is more like performing than listening
