Do I cut out the r13 fiberglass insulation behind the woofer{mounted to the baffle). I know I leave it on the back of speaker box. They are stuido two speaker kits. and Im about done with the cabnets. R. WOOD

Insulation is live end-dead end. Goes on the entire rear panel but not on the front. On the bottom but not on the top. On one side but not on the other. JBLPRO also covers the cross braces.And there you have it.Creating is more like performing than listening
