I sent the plans twice, but received a "space full" error message. So I'll try it again right now.

Subject: Thank's, but about horn flare?

Dear Wayne,Thank's for the plans, but I still confused with horn flare, what is the type You use? If I see from the cut out, looks like You use H295 flare, is that right? And what you recomend for a karaoke room, Thermionic six or seven or Theater six or seven?Thank's in advance.Regards,Gabriel

Subject: Radial

The horn is an H290, and we've also used the Peavey CH-3 and Martinelli wood horns.As for intended use, I wouldn't use any cornerhorn speaker for karaoke unless you're absolutely certain that corner placement is approriate. In clubs, it usually isn't.

Dear Wayne, my uncle is crazy about karaoke, he and all his friend is going to karaoke twice a week, and he build his own 2 karaoke rooms, the room is rectangular and the size is about 6X12 meter (I plan to use Theater seven), and the karaoke room in the bungalow is 4X10 meter (I plan to use Thermionic six). I have seen the room and both have height about 2.5 meters. Can it works? And do you have any recomendation for subwoofer that F3 is 29Hz, but the size is about 2-3 cubic feet?Thank'sRegards,Gabriel
