Hi to all and happy holidays. I am starting a new 3way project using a pair of Richard Allan CG12s for the bass and then? I need suggestions for mids and treble drivers. The CG12s are 98db efficient and i`m going to be driving them with new 300b push pull amps. I realize there isn`t much to go on here but i`m just feeling my way along so far. Thanks, Steve.
