---

I have recently acquired a pair of custom built 18" drivers without motors and I'm trying to figure out where I can get some. I particularly like the large JBL motors. I need a pole piece with a gap for a 4" voice coil. I don't know where I could buy just the motors, but I guess I could look for some blown speakers and take the motors off and put them on mine. Any help would be appreciated. Thanks.
