Subject: I need some help on selecting a Pi speaker

I have a very small room (12X14) that I have been trying to find a horn system for. I understand the Pi corner horns are recommended for this situation. Would someone give me some guidance and recommendations. I am using a Welborne 300B amp and the speaker should have a good WAF. Thanks for any help

I don't know how sensitive that amp is for speaker load, but the Stage Series and Professional

need an amp with some oomph though. The most tube friendly model is the Theater Series

truly excellent, but it is large too.
