Just wanted to know if anyone has heard or heard of these speakers. I thought this speaker might be of interest to this group because it's based on the JBL 2226 and 2426, the same components in the 4PI PRO. However, instead of a 90x40 flare, a 100x100 is used outside of the LF cabinet. XO point seems to be lower too, at 1KHz. Does this mean that the 4PI PRO is THX certified too?Gar.

There were lots of discussions about this speaker, a while back on this forum. We also discussed some other similar JBL offerings - Good stuff!
