Those are really attractive speakers! I love the look of the red highlights - Very interesting! What wood is that, by the way? Looks like teak. Is it?Excellent job! Just wonderful!

I'm happy you like them. Soundwise they are even better than they look. If you play loud or just as background they allways sound good !! The wood is zebrawood-veneer on the speakers and solid zebrawood for the amplifier enclosures.Jim

I guess you would be satisfied; myself, I'd be turning cartwheels. Nice engineering job. Having a vision and making it happen. Excellent!

I love those horns! Did you build the cabinet yourself, too? I haven't seen anything like that with all the drawers in it.
