Did anyone compare these two brands in their own suitable cabinets? Can the Beyma's approximate if not better the sound quality of the JBL's? Listening volume is only around 94db. Here are the component list I am looking at:18" sub (120hz below) JBL 2241H vs. Beyma 18G4012" midbass (120hz-1.2khz) JBL 2206H vs. Beyma 12G/3201" exit horns (1.2khz-5000khz) JBL 2426H vs. Beyma CP380Mbi-radial horn tweeters (5000khz above)JBL 2404H vs. Beyma CP-25Note that the Beyma's are only 40% of the cost of JBL's here in our country.
