Wayne,I am thinking the Theater 4's might be too big for my wife and my room. What are the next best options in a smaller box? Is there a big difference in sound between the Theater and the Thermonic series?Thanks!!tdb

I'll bet if she heard them all her cares would vanish! Wish I could hear my 4Pi's for the first time again.

No doubt she could not move them out if I moved them in. You did a fantastic job on your 4's. Could you provide me with a few details on the grills. I need to keep the little ones away from the driver. Todd

Give a look at the dimensions for the 4pi Stage cabinet. Very nice speaker and managable size.

The Stage 4 looks like a winner. No problems with my EL84 based tube amp? How does the degree of difficulty of the box construction compare with other models. I built my amp and preamp

---

from scratch - this will be my first adventure into speaker building. Can you please send my the Stage 4 plans. Again - Many Thanks!

SET amps, but it usually does pretty well on powerful P-P jobs. It sounds great on a Paramour 2A3 parafeed SET amp too.
