Wayne,I wonder if you could give a short discription of the differences between the Stage, Premium and Professional 4 Pi's. I am looking to resurrect some early 60's cabinets that I inherited which originally contained Jensen drivers. These smaller 4 Pi's look like they might work.

The Professional Series use a flux stabilized midwoofer, so they have significantly less distortion. The Stage Series sound very nice too, although the motors don't use a shorting ring. Both are 600 watt speakers with average sensitivity of 97dB/W/M. The Premium is a 1200 watt speaker, so is capable of higher maximum SPL.
