Hey Wayne (or anyone else), any experience with the new neo. magnet Deltas from Eminence? How do they sound, and what are your thoughts on crossover implimentation? Could a relatively standard 1.5 kHz, 2nd order, with a zobel, coupled with a PSD2002 be implimented without any problems?Adam

Hi Adam,I haven't tested the Deltalites yet. But I'm planning to evaluate them very soon in the midhorn, so I'll let you know.Wayne
