I just saw this over on ProSpeakers and replied there. Basically, my response is that I didn't find it in the charts and so I'd write to JBL and ask them. You'll need a recone kit anyway.
JBL Recone Where Used Chart

Try searchin/asking at the forum at www.lansingheritage.org.There is a wealth of jbl info hidden there and some of the usersare VERY familiar with both old and new jbl products.cheersandreas

No, I don'tknow what recone kit will fit, and that's why I included a link to the "where used" chart.

It's not on there, so I'd call JBL. Best to get your info straight from the source.
