I am new to these speakers. I am looking for a speaker kit as I am very good with wood and would enjoy building a nice speaker. My question is: What comes with the kits? Plans, Drivers, Wood, Hardware???Also are there any Reviews of the speakers?Thanks

copy of the plans. For larger speakers that incorporate a compression tweeter and crossover network, kits also include the crossover, tweeter compensation cable assembly, midrange cable assembly if used, Zobel woofer damper if required, and all cable assemblies are completed and ready to install. Every kit containing a compression driver also includes the horn flare and the

shopping cart, so you might check there. And there are a whole lot more reviews and comments right here in the forum. So you might use the search feature to look around for posts on a specific speaker that you might be interested in. Just enter the name of the speaker in the search field. Here are some examples:2 PiTowerTheater 47 Piseven Pi
