HelloI am thinking about buying a pair of Pi speakers and was wondering if anyone had any suggestions as to which set of speakers would be the most appropriate to the set up and type of music I listen to. I use a bottlehead pre and a solid state quad amp, speakers are ed frias diy, that I am vey happy with, just thought I might need a little more base.I am looking for quality of sound rather than quantity. We listen to jazz, classical, and people like Patricia Barber Dave's True Story. Also the added problem and expense of getting them shipped in kit form to Australia would come into the equationRegards from Australia Roger

You could consider a 4 Pi using a Delta lite 15"
