Recieved my pi 2 speakers today. Just want to make sure since I don't know, but I assume the coil on the speaker connetion goes to the tweeter and the one without goes to the woofer. Is that correct?

No, just the opposite. Coil goes to the woofer and straight wire to the tweeter.

You bet. Tell me what you want to know and I'll try to point you in the right direction. For starters, here is the CTS applications sheet on the tweeter and the Eminence datasheet on the midwoofer.Piezoelectric tweetersEminence Alpha 10

Thanks for the info. It will take me some time to read through and absorb! Do you have any info

on how crossovers work?
