Are all the dimensions for the corner horns list on the web site accurate? They are listed as: Theater 7-pi: 66"x24"x36" Stage 7-pi: 54"x18"x30" Premium 7-pi: 54"x18"x30" Audiophile 7-pi: 54"x18"x30" Professional 7-pi: 54"x18"x30" Stage 7-pi 18: 66"x24"x18" Premium 7-pi 18: 66"x24"x36" Audiophile 7-pi 18: 66"x24"x36" Professional 7-pi 18: 66"x24"x36" I was about to order the Theater 7-pi kits but then noticed the dimensions are much larger than the others. I just wanted to verify the sizes before I ordered, since size is a concern for me. Thanks

The T/S parametres for the Delta15 is very different from the Omega, Kilomax or JBL. Notices how the Theatre 4's are also much larger than the Stage, Premium, or Professional?

I figured as much, but I didn't want to make any assumptions. Thanks

and tweeter on top of that. The bass bin for the Stage, Premium, Audiophile and Professional compare them, if you want.

If you haven't seen a cornerhorn, you'll be amazed how they seem to snuggle back into the corner and not take up much room at all. These are monster dimensions, which is good acoustically, but difficult to fit into a room unless they're packed away into corners. But when you put them in corners, they seem to take up very little room at all.

Thanks for the offer. You've sent me some drawings already and I made a cardboard mockup. They (the drawings) are labeled sevenPi_Magnum so I'm guessing they are for the Audiophile series. I'd prefer the shorter version for WAF reasons so no need to send Theater drawings.

Numbers on a page are still just numbers. I recommend you make mock-ups out of cardboard boxes to get a true sense of the dimensions before cutting any wood. Compared to building the actual speakers, the cardboard mockups are a breeze to do and will save you from any surprises.

Actually, in retrospect, would you mind sending the drawings for the Theater version? The Theater's are already a bit more money than I originally intended to spend, so I'm not sure I want to pay the extra \$70 for the Stage version. The flip side is that I wanted to be able to upgrade later, which would, at minumim, require the Stages.

Sorry, but I can't remember your E-Mail address. Please tell me and I'll send plans.

Actually did that for the smaller 7's. They are huge, which is why I was concerned about the larger Theater 7's.
