I'm interested in getting some speakers for my dorm room next year. Right now I have a audiosource One power amp, but I plan on getting a tube amp in the upcoming months. The pi ones look good as they should be sensitive enough for a tube amp, and small enough for a dorm room. Is the $349 price listed on the website for a completely assembled pair of speakers?

Prices are for individual speakers, not pairs.

but they are assembled, not in kit form?

Yes, the $349.00 speakers are completely assembled.
