Anyone know it? Would it be a quality (for the low price) way to bi-amp?

Bill, I have not found a SS electronic crossover that has been blessed for audiophile use that did not cost near a \$1000.00! However the Steve Bench tube powered electronic crossover would be a better match to the level of quality you are using. Ron

The other other Bill have used Marchand in his speakers. Martinelli might be able to give a review on them.

I heard, or should say, didn't hear the Marchand at Bill's. BUT, this thing is Less than \$100. My Bugle uses op-amps and sounds great. I may give it a shot after I build the as yet un-named 45 mono blocks.

The Bugle's a great design and the use of OPA2134 opamps probably helps its sound too. Replace the stock opamps in this \$100 XO with OPA2134's and you may end up with something very decent. My experience with active XO and multiamp-ing is that even if the XO is so-so, you'll still get a huge improvement. The only reason why I don't have my system in this configuration full-time is that my wife finds it hard to use.
