Hi Wayne.I'm still trying to find the parts for the 7 pi speakers.And I stumbled over this one.I want to upgrade to a woodhorn, and thought I could use this in the mean time, and just unscrew the driver and mount it on the woodhorn when I get that done.RegardsKim

I've never used that horn. It doesn't look like a 90° horn, is it?

I don't know anything about that horn.But the drivers are the same as the drivers you use, just the screw-on type right ?I can get the bolt-on type and the horn from Great Britain but at a 30% more price.I will send you an email for prices, but I think the prices on shipping is to expensive.RegardsKim
