I was at RMAF last weekend, and it seemed that anything with ribbon tweeters sounded very good to me. Would it be possible to use a ribbon tweeter in place of the horn in a Theater Four?I was thinking of something like the Fountek NeoCd2.0 Ribbon.

I love the sound of good ribbons. But they don't have the output of a horn, and I don't suggest

Where would one purchase a pair of these? Google didn't provide much in the way of vendors.

Found them at Madisound. Published response is flat. I wonder how they sound.

Check the power handling too, unless you're driving them with low power.
