Remember Conelrad?It seems that my Yahoo Photos don't show up?Does this?There's this phrase (?phs34RDBqInK2SBq) after JPG that wants to be included. Can you see the Foto?I can. But some say not.

I can't see it Bill. I think probably you are logged in to your account, or maybe the image is cached on your local disk drive.

No, I wasn't logged in when you viewed. As far as being in my cache I don't understand. And wWhen I get rid of the symbols after JPG it doesn't work. Hmmm.

I don't think Wayne meant you were logged in when he viewed, but that either you were logged in when you viewed (at least by a cookie), or that the pic was cached in your machine in a temp file or cache so that your computer could call it from that even if it's not available from the www server. I can't see it either- gotta find the magic button or whatever.....

Oh, man, that's gorgeous! Did you buy the transformer covers separately or did they come with the kit? Mine were extra, but definitely worth it. I like the shiny look, is it brushed aluminum, stainless or chrome? Mine is black sprackle paint.

Subject: Re: Chassis brushed Stainless, covers chrome nt
