Subject: Two Pi Towers - Placement?

I would like to hear from anyone who has used or is currently using the Two Pi Towers. I am curious about speaker placement, i.e. distance from walls, etc. I am also curious about what kind of room they work best in, as some speakers require rather large rooms in order to sound good.

I suggest using the two towers with their backs against a rear wall, spaced 3" - 6" away from it. If they need to be placed near corners, position them a couple feet away from the corners if you can.
