View Forum Message <> Reply to Message

Do you have any specs or measurements for these new horns? Since they're 800hz horns, are there changes to the 4Pi crossover to lower the crossover frequency a bit? How might they compare to the Peavey CH-3's I have? Good work. I didn't even know you were working on these.

They're designed to use the same crossover point and physical position. Watch the forum for announcements and more information.

Subject: Could I have the plans too please?
