driver specs: $R_e = 5.4$ ohms $L_e = 1.27$ mH $C_5 = L_e/R_e^2 = 1.27/5.4^2 = 1.27/29.16 = 0.4355$ uFs my math off? This value seems a bit low. Adam

$1.27\text{mH} = 1.27 \times 10^{-3}$ or 0.00127 Henries. The capacitor you want is 43.5uF .
