Good evening folks,I have a quick question, can anyone recommend which speaker kit equivalent to the klipsh la scala. Equivalent or similar to the sound quality and efficiency of the la scala. I'm going to be using the speakers in my shared loftspace. We are planning to do some private parties similar to [www.loftnyc.com](http://www.loftnyc.com) =)Thanks for your time and recommendations.v

Well; you're in the right place. Pi's Theater/Stage/Pro they all will do exactly what you describe with good sound and they are pretty indestructable. They should have a more refined sound than Lascala's while being as efficient. They use better quality drivers and crossovers.
