Hello, I've read your messages regarding your 2Pi subwoofer. I am very interested with your subbox designs. Could I have the plans send for me, I plan to build 4 of them for my personal use. Thank you so much

sub with a 10" woofer. I suppose you could make something with an Alpha 10 or HL10 or others,

sub is necessary. Maybe that's what you want?

Hi Wayne, Just a question. Did you use "Pialign" software -- when you mention the Two Pi Tower -- for the speaker underdamped? What is the volume of the box for the 10" ALPHA? Thanks and Regards.
