Ted Weber is selling his PA10, which is supposed to have specs similar to the Alpha 10, for \$10 each. https://weberspeakerscom.secure.powweb.com/store/sr.htmlSE Surplus has real Motorola KSN-1056 piezos for \$2.10 each if you buy 10 (\$20 minimum order).http://www.isesurplus.com/720.htm

the Pi Two's are already a great value for the money- probably best out there. Why would someone use bandwidth Wayne pays for to promote knockoffs or competitive products?

My primary purpose for the post was to offer a source for the Piezos that are no longer in production, and thus hard to find. Wayne does not use these in the Two Pi any longer, for that reason. Wayne - If I have crossed the line, feel free to delete my post.
