HI,I'm looking for Pi speaker suggestions for a Dynaco ST-70. A friend has a pair of Pi 4 stage speakers that I will audition soon. But are these the best Pi for the job? What about the thermionic series? also the room size is approx 22x25 and I would like to keep the cost around $600.ThanksTed

I think you'll find any of them will work well for you. I like the Professonal Series best and my

the price.
