Hi Wayne,I am currently contemplating building the Pi 7 audiophile or profesional speaker - I am unsure as to if I am currently capable of this project DIY- I have built a DIY reflex cabinet before.What I want to know is - can I do it? Will I be able to understand the plans?Best regardsStefan

Hi Wayne,Could not resist looking through the plans / documents you sent - the documents labeled crossoover.jpg seems to be empty is this how it is supposed to be or is it just my computer?. The rest of the .jpg documents seemed Ok.BTW it does not look that hard to build - but some more study first - followed by some action over the summer hols Best regardsStefan

The crossover is a GIF file, so check and see if your PC blocks GIF files for security purposes.

Hi Wayne,The other Gid files came over Ok and had contents in - so not sure why this one was empty? Does it read Ok on your end?. If it is Ok perhaps if ou resend it the problem will go away.RgdsStefan

All the other image files are JPG files, and the security settings treat those differently. I suspect that's probably the problem and that you can change settings to be able to view it. But I'll resend the plans just in case.
