Hi Guys,Wayne has generously allowed me to post my ad for the sale of my Theater 4's. These were built by me using baltic birch plywood front, rear, top and bottom panels and MDF side panels with cherry veneer on all. I used my own design to incorporate grills which can be seen in the attached photo. Those who have heard and seen these have raved on the performance and build. I have external crossover boxes mounted on the rear with Alpha Core coils, Solen, Jensen, Auricap and Mills components. Drivers are Eminence Delta 15" and Eminence psd 2002 compression driver with H290 horns.I'd like to get $1000 for these and they must be picked up here in eastern Massachusetts. I may be able to arrange local delivery. I need to make room for our piano in the already too small listening room, so a smaller pair of Professional series is the plan. E-mail me at garland03 at rcn dot com.Thanks, Garland
My custom Pi Theater 4's
