Wayne,Please send me the plans for an Audiophile 7 pi bass bin (15 inch). I may team that up with an Altec 511b horn and 806 driver, along with an Eminence APT-200 tweeter. I'm currently use that combination with Klipsch Cornwalls as bass bins and custom crossovers. It sounds great to me but, would like to use the Cornwalls in another system.Thanks

same box but had Eminence Magnum drivers. Later I started testing B&C drivers for the Audiophile Series but the point is that the Audiophile Series is in flux. You can take the same basic box and use selected JBL, Eminence or B&C drivers. In some cases, there are slight crossover changes but the cabinet is the same.
